DATE: July 8, 1986
TO: Distribution
FROM: V. McLane *VM*
SUBJECT: Redundant Data Entries

In the process of looking at the data, we have come across the following five data sets which contain data from the two sets of experiments, at 14.8 MeV and for fission spectrum neutrons, entered in various combinations: 40256, 40408, 40547, 40552, 40553. Most data is entered at least twice.

CINDA gives the latest references as:

- AE,55,218 (1983) for 14.8 MeV
- 79KNOX,,995 (1979) for fission spectrum average

These are not given as a reference in any of the entries.

We request that CJD clean up these entries as soon as possible.
