Subject:	SIG/SUM correction for NRDC2009 discussion

In EXFOR data base there are Subents with obsolete code SIG/SUM .

It's proposed to correct these Subents according to the nowadays rules.

This code SIG/SUM is not mistake, but now when somebody select data for cross sections, these reaction (SIG/SUM) appears in the separate line, but not together with other data of the same reaction.

To select data and to make plots automatically, it would be better for users, if these data could appear as the same reaction coding group .

One example is given on Figure made by QuickPlot:

List of Subents with code SIG/SUM:
