Memo CP-C/272

DATE: 14 September 2000
TO: Distribution
FROM: V. McLane
SUBJECT: Polarization Dictionary updates

Attached is a complete list of polarization quantities. If the polarization proposal is accepted, only these quantities should remain in the dictionaries. All others should be marked obsolete.

I have updated all BNL entries which required updates. These will be sent in TRANS C044. Aside from these, I have found only one other entry in the library which needs updating. This entry is from area 2. I will volunteer to update it and send it NEA Data Bank for inclusion in a transmission file.
