Subject: New country codes and related lab codes for Exfor Dictionary 3

We are proposing the following new country codes for Slovenia, Croatia and countries of the former Soviet Union:

Area 3:

3CROCRO (CROATIA)
3SLKSLK (SLOVAKIA) (code tentatively reserved)
3SLNSLN (SLOVENIA)

Area 4:

4ARMARM (ARMENIA)

Note: the code 4CCPARM is currently used for INST.FIZ.A.M.ARMENIANSSR, JEREVAN. No CINDA or neutron Exfor entries exist for this lab, but several photonuclear Exfor entries in the M-series exist. We propose to use 4ARMARM as country code and to introduce a different code for the Jerevan Institute, e.g. 4ARMJER. NDS volunteers to retransmit the affected M entries in a special TRANS file.

4AZRAZR (AZERBAJDZHAN)
4BLRBLR (BELARUS)

Note: the code BEL is taken by BELL TELEPHONE LABS., USA

4GRGGRG (GEORGIA)
4KASKAS (KAZAKHSTAN)

Note: the code KAZ is taken by INST.JAD.FIZ., ALMA ATA.
(More than 900 CINDA entries)

4RUSRUS (RUSSIA) THE RUSSIAN FEDERATION
4UKRUKR (UKRAINE)

Note: at present there is an obsolete code 4CCPUKR in the dictionary
which will be replaced by 4UKRUKR

4UZ UZ (UZBEKISTAN)

Note: the code UZB is taken by INST.JAD.FIZ., TASHKENT

Please note the following:

- The codes 4ESTEST, 4LATLAT, and 4LITLIT for Estonia, Latvia and Lithuania, respectively, have been introduced with the last interim dictionary update (April 1992).
- All lab codes in dictionary 3 using the old country codes, e.g. 4CCPFEI, will become obsolete (O in col. 80). At the same time the corresponding new code - using the same 3-character CINDA lab code - will be introduced, in this case 4RUSFEI.
(This procedure is different from the one chosen earlier for the former DDR, where the old codes were flagged extinct - remaining valid for old works - and new codes are introduced only when needed, using different 3-character CINDA lab codes.)
- CJD is asked to check all area 4 entries for correct assignments of country codes and to inform us of any corrections or changes in the institute's names they know about. A provisional list of the new institute codes is attached for this purpose.
- The area 4 changes will be transmitted after approval at the forthcoming data centres' meeting. At the same time with dictionary 3 the related corrections in dictionaries 5 and 6 will be made.
