

Memo CP-D/257

27 June 1995

To: Distribution

From: O. Schwerer *O. Schwerer*

Subject: Dictionary transmission 9069

Dictionary transmission 9069 is being distributed in TRANS format and/or as DANIEL backup file, depending on each center's choice as agreed at the May NRDC meeting. Those centers served by FTP already have it by the time this memo is distributed.

I made an effort to include all updates pending from before the NRDC meeting plus all those updates agreed at the meeting which could be made immediately without the need for further information from another center.

For the 'unweighted production cross sections' needed for the revised version of the Exfor L-series, the code UNW,SIG (as proposed at the meeting by Vicki McLane) was added to dict.36 (see conclusions 64-67 in memo CP-D/256). The related addition to Lexfor is submitted in memo CP-D/258.

The special quantities and headings for relativistic heavy ion data (memo CP-C/208) were added. Some of the special flags for these codes, mostly needed only for DANIEL but not for the TRANS dictionaries, will have to be added or modified later, in consultation between NNDC and NDS.

A number of new codes proposed some time ago by NNDC (before the 1994 NRDC meeting), mainly for dict.36, were not added so far because additional clarifications, longer expansions, new Lexfor entries etc. had been requested. These codes will be reviewed again and may be added in the next updates, if enough information is available. They do exist in DANIEL (but not in the TRANS dictionaries) with status PROposed.

Distribution:

M.R. Bhat, NNDC
N. Tubbs, NEA-DB
V.N. Manokhin, CJD
F.E. Chukreev, CAJaD
V. Varlamov, CDFE
Zhang Jingshang, IAE-CNDC
Y. Kikuchi, JAERI
T. Tendow, RIKEN
K. Kato, JCPRG
F. Tárkány, ATOMKI
V. McLane, NNDC

NDS: R. Arcilla
M. Lammer
