Memo CP-D/467

Date: 15 August 2006

To: Distribution

From: S. Dunaeva and O. Schwerer

Subject: New report code (Dictionary 6)

The following new code is proposed for dictionary 6:

ISINN-
for the proceedings of the *International Seminar on Interactions of Neutron with Nuclei* which is held every year in Dubna, Russia.

Six years ago, after a lengthy discussion about coding of these conference proceedings, the 2000 NRDC meeting decided that these conferences have to be coded with the appropriate JINR report codes, e.g. JINR-E3-…, with the name of the conference to be given in free text.

For most of these conferences, conference codes in dictionary 7 had been introduced, such as 96DUBNA. These were meant to be used for immediate entering into CINDA and possibly EXFOR, to be replaced by the final proceedings code after publication. If no immediate entries were made, only the JINR- report code should be used.

This was enough for its coding at that time, because the report number usually appeared on the first page of the proceedings with its title.

However, from 2001 there is no report number any more on the first page. The publishers keep it but only on the last page in very fine font. (Therefore new conference codes were introduced in dictionary 7 for the 2001 and 2002 conferences.)
Furthermore, since 1993, when the new title *International Seminar on Interactions of Neutron with Nuclei (ISINN)* was introduced, most of the scientists know these proceedings as ISINN series.

Therefore we propose the new conference code ISINN- (followed by the number of the conference), and to add the new code to all old compilations from 1993. This will help the users who are looking for the proceedings.

For example: ((S,ISINN-7,page,1999)=
              (S,JINR-E3-99-212,page,199905)=
              (C,99DUBNA,,page,199905))

No dictionary 7 conference code will be needed for future conferences of this series.
