Memo CP-D/719 (Rev.)

Date: 24 January 2012

To: Distribution

From: N. Otsuka

Subject: **Dictionary 236 (Quantities) - PR,KEM**

Reference: Memo CP-D/599

According to the general agreement on fission quantity coding summarized in Memo CP-D/599, the temperature of the prompt fission neutron spectrum approximated by a Maxwellian spectrum should be coded as

(- - - (- , F) **0-NN-1**, PR, KEM) rather than (- - - (- , F) , PR, KEM, **N**)

. This change has been already made in 20175.002 in PRELIM.2227. I agree with this change, and propose the following change in the dictionary:

Dictionary 236 (Quantities)

PR, KEM	Temperature of Maxwellian distribution of prompt products specified
PR, KEM, N	(<i>Obsolete</i>)
