Memo CP-D/758 (Rev.)

Date: 8 August 2012

To: Distribution

From: N. Otsuka

Subject: **Completeness checking (Frascati deuteron data compilation)**

Reference: Memo CP-D/757

There is a laboratory report compiling deuteron-induced reaction cross sections prepared by A. Gentilini and B.V.Robuch, (ENEA, Frascati). S. Ganesan (NPDCI) provided me a copy of this report to perform completeness checking of deuteron activation cross sections compiled in EXFOR several years ago.

On the occasion of the completeness checking with Landolt-Börnstein compilation, I finalized the result of checking done with assistance of Lidija Vrapcenjak. Totally 139 articles compiled in the Frascati report was assessed as we did in Memo CP-D/757. We are missing 62 experiments in EXFOR.

	Status of article	articles	(%)
	Compiled	67	48
C	Not compiled. New entry must be created. (not in LB)	35	25
L	Not compiled. New entry must be created (also in LB)	26	19
S	Not compiled. But the work is compiled from another article.	2	1
X	The article is not available.	9	7
	Sum	139	100

Articles belonging to the 2nd (C), 3rd (L) and 4th (S) category require creation and revision of EXFOR entries, respectively. Centres are asked to assess articles and start compilation and revision of EXFOR entries.

All articles for compilation and revision summarized in two memos (Memo CP-D/757 and 758) will be registered to the NRDC article allocation web page (<http://www-nds.iaea.org/nrdc/alloc/>) as we usually do for old articles, and progress will be reviewed in the NRDC Meetings.

Actions to Centres (2012-08-08)

Actions:

- C: The article must be compiled in a new entry. Send its entry number to NDS (=Valentina).
- L: The article must be compiled in a new entry. Send its entry number to NDS (=Valentina). Also listed in Memo CP-D/757.
- S: The article must be added as a secondary reference.
- X: The article is not available at NDS. If possible, obtain the article and assess whether data for EXFOR compilation are given.
