2. Some remarks for MEMO CP-D/259

Dr. O. Schwerer took our attention on using IND, CUM, UND in SF5 of REACTION. We use these codes to help the users. Of course, IND is redundant for production of Be-7, but user must investigate Chart of Nuclides or another handbook to remember it. When we use redundant information we have aim to relieve user's life.

This redundant information does not contradict EXFOR rules, according to our understanding of EXFOR Manual.

We would like to thank Dr. O. Schwerer for his attention on our compilations, as his remarks will help to improve CAJAD checking code.
