

MEMO CP-A/76  
-----

09 December 1996

To: Distribution  
From: F.E. Chukreev  
Subject: 1. Addition to Dictionary 27.  
2. MEMO CP-C/223 (Dictionary 25)

1. The following additions should be made:  
DICTIONARY 27  
57-LA-133 ( 3 )

2. MEMO CP-C/223 asks to include new measurement unit (B\*KEV) for astrophysical factor.

Dictionary 25 contains five similar units: MB\*MEV, B\*EV, B\*MILLI-EV, MB\*EV, MB\*MILLIEV.

You can see, that MB\*MEV=B\*KEV. EXFOR dictionary contains one duplication now for this subject: B\*MILLI-EV=MB\*EV.

I remember, that some years ago NDS disseminated the paper of Dr. Smith, which attempted to take EXFOR community attention for some inconveniences EXFOR compilations for users. The multiplicity of measurement units had been included in the Smith's list of these inconvenience.

Therefore I would like to propose do not include B\*KEV in Dictionary 25 and exclude B\*MILLI-EV from this Dictionary.
