Subject: Addition to Dictionaries.

Dictionary 24.
ANG2-CM Angle, C.M.System, definition given in BIB.

Dictionary 36
DI,DE (Differential c/s d/dE, direct interaction contr.)

Dictionary 2
ANG-SEC (SECONDARY ANGLE)
Keyword optional. Either free text only, or coded
information in parentheses, with or without free text.
SF1: field heading to be explained, e.g., ANG1
SF2: nuclide to which it refers in the form Z-S-A-X

Explanation: Dictionary 24 requests to define angular quantities in
BIB section. But keyword for this definition is not
determined. Therefore a computer checking of needed
explanation is impossible.
Angle variables have an importance, such energy variables.
We have EN-SEC for definition SECONDARY ENERGY.
It will logical, if we will have special keyword for
SECONDARY ANGLE too.
