**Memo CP-D/374**

**Date:** 12 December 2003  
**To:** Distribution  
**From:** O. Schwerer and V. McLane

**Subject: Dictionary 21 and 24 updates**

During discussions at the compilation workshop the following new dictionary codes came up and are herewith proposed:

**Dictionary 21 (Method)**

FNB        Filtered neutron beam

**Dictionary 24 (Data Headings): Digitizing errors**

When curves are digitized, compilers may wish to give a digitizing error in computer readable form. On the other hand, these errors are not experimental errors, therefore the existing error headings should not be used. Therefore we propose to introduce the following new headings for digitizing errors for the most common variables (others to be added when needed).

ERR-DIG	Digitizing error (of DATA)
EN-ERR-D	Digitizing error of incident particle energy
E-ERR-D	Digitizing error of outgoing particle energy
ANG-ERR-D	Digitizing error of angle
