**Memo CP-D/446**

**Date:** 25 November 2005  
**To:** Distribution  
**From:** S.Dunaeva, O.Schwerer  
**Subject:** **Usage of reference type X (Preprint)**

We propose to expand the usage of the reference type X (Preprint), introduced last year, to cases when an article was taken from an Internet website. This is one of the type of Preprint – electronic preprint.

Now there are a lot of web sites where a lot of articles are collected. Some of them will be published later and a few of them – not. Anyway we must have possibility to enter them in EXFOR.

The format is as described in the manual, i.e. the same as for private communication and for theses. Free text should be added giving information about from where the information was taken, and/or where it will be published (e.g., "To be published in Nucl.Phys.A", or "taken from web archive ..... ", etc.)

The compiling center is responsible for replacing the Preprint reference by a corresponding final publication and to retransmit the entry with this modification.
