## Memo CP-E/087

**Date:** February 15, 2006  
**To:** Distribution  
**From:** OTSUKA Naohiko  
**Subject:** Corrections to Dictionary 236 (Quantities)

Expansions of quantity codes **MLT , N** and **PAR , MLT , N** are followed by short remarks:

"For *non-neutron induced reactions* only. For *neutron-induced reactions* use ',NU'.  
"For *non-neutron induced reactions* only. For *neutron-induced reactions* use 'PAR,NU'.

However our conclusion 17 of 2005 NRDC meeting is  
"Neutron multiplicity from fission will be coded with NU for all projectiles"

Therefore now \*,MLT , N and \*,NU should be applied to *non-fission neutron multiplicity* and *fission neutron multiplicity*, respectively.
